

Global Manufacturing- Steel EMT Compression Connectors

Features

Our Global Manufacturing line of Steel EMT Compression Connectors are similar to conventional EMT fittings both using either set-screw or compression rings to secure EMT piping. This fitting allows you to connect flex conduit to piping at various sizes. EMT Connectors are used to connect two EMT pipes together, or to connect an EMT pipe and a Rigid Pipe together. Global Manufacturing offers its Steel EMT Compression Connectors from sizes of 1/2" to 4".

Sizing and Features

Product	Size	Product Description	Box Qty	Sizes		
				A	B	C
G-SCCON050	1/2"	EMT Compression Conn. (Steel)	50	1.750	1.250	.406
G-SCCON075	3/4"	EMT Compression Conn. (Steel)	25	1.813	1.563	.406
G-SCCON100	1"	EMT Compression Conn. (Steel)	25	2.000	1.813	.406
G-SCCON125	1 1/4"	EMT Compression Conn. (Steel)	25	2.750	2.188	.500
G-SCCON150	1 1/2"	EMT Compression Conn. (Steel)	20	3.000	2.438	.500
G-SCCON200	2"	EMT Compression Conn. (Steel)	20	3.188	2.938	.688
G-SCCON250	2 1/2"	EMT Compression Conn. (Steel)	12	3.875	3.688	.750
G-SCCON300	3"	EMT Compression Conn. (Steel)	12	4.375	4.313	.938
G-SCCON350	3 1/2"	EMT Compression Conn. (Steel)	6	4.500	4.875	.938
G-SCCON400	4"	EMT Compression Conn. (Steel)	6	4.750	5.375	.938

- Steel
- Compression Type Connector
- Concrete Tight
- Assembled with Insulated Throat
- UL Listed
