

Global Manufacturing Aluminum Foil Tape

Features

Our Global Manufacturing Electrical Tape is a dead-soft, general purpose, aluminum foil backed tape with a paper liner designed for maximum adhesion over clean, dry surfaces. It features a high tack rubber adhesive which is ideally suited for difficult to adhere to surfaces such as low energy substrates. We offer this product in 2" x 60' rolls.

Sizing and Features

- **Adhesive Tape:** this foil tape with aggressive rubber adhesive sticks well to most surfaces. The vapor shielding tape also adheres to irregular surfaces, irrespective of the weather conditions
- **Applications:** the silver aluminum tape can be used for shielding, patching, seaming, and sealing to protect the materials from moisture, heat, odor, and chemical transmission.
- **Temperature Friendly:** the odor resistant tape meets American UL-723 standards for flame spread and smoke. The rubber adhesive tape dissipates excess heat and ensures heating and cooling efficiency of sensitive materials
- **Multipurpose Tape:** this adhesive foil tape works suitably well in general, commercial, and industrial applications. It can be used for aluminum seams and joints, sheet metals, fibrous and metal ducts, and aluminum backed duct boards
