

# Global Manufacturing- GFCI

## Features

Our Global Manufacturing GFCI's (ground fault circuit interrupter) are the best devices used in the industry to protect people against harmful electric shock from an electrical system. This outlet will constantly monitor the electricity flowing through a circuit, in order to sense interruptions in current. If the current suddenly fluctuates wildly or is dropped, the GFCI will trip, cutting all power immediately to prevent harmful electric shock.

## Sizing and Features

Product	Product Description	Box Qty.
ARK15-I	GFCI Ivory Self-Test	
ARK15-W	GFCI White Self-Test	
ARK15-TR-I	GFCI Self-Test w/ LED Ivory	
ARK15-TR-W	GFCI Self-Test w/ LED White	
ARK15-TRWR-I	GFCI Self-Test Ivory TR/WR	
ARK15-TRWR-W	GFCI Self-Test White TR/WR	
ARK20-I	GFCI Ivory Self-Test	
ARK20-W	GFCI White Self-Test	
ARK20-TR-I	GFCI Self-Test w/ LED Ivory	
ARK20-TR-W	GFCI Self-Test w/ LED White	
ARK20-TRWR-I	GFCI Self-Test Ivory TR/WR	
ARK20-TRWR-W	GFCI Self-Test White TR/WR
